

Warden Construction Ltd as a specialist company having recognised its responsibility for environmental matters, place, a high priority on environmental affairs with regard to company operations and our impact upon the environment. The company operates a policy of effecting continuing improvement and change in accordance with developing knowledge and legislation. Our employees are aware of the environmental sensitivity of the business sector in which we work and seek to continually lessen our environment impact. The following objectives form the core of our approach to environmentally managing our operations:

All company operations are carried out with due regard to all appropriate legislation and regulatory considerations.

Consideration of waste minimisation and waste management will be made during the design phase of any our undertakings.

The company will continue to make available resources to ensure that suppliers and customers are made aware of their environmental and regulatory responsibilities.

The Company will take appropriate measures to ensure that the collection, transportation, storage, recycling, reclamation and disposal of waste do not become hazardous to the public health or the environment.

Company waste (i.e. general and special waste) will not be stockpiled or treated at company sites or premises without the appropriate waste management licence.

The company recognises the control of pollution act, duty of care regulations that gives us responsibility for all our waste until it reaches its final disposal site.

Any hazardous (special) wastes will be disposed of according to the special waste regulations.

The company will only use disposal facilities where the level of operational control and environmental compliance is deemed to be of a suitable level and represents responsible waste management.

The company will ensure that all its vehicles and equipment are well maintained in line with manufacturer's guidelines and operated within legal limits.

The company will ensure that all it's staff are kept up to date on the safe handling and disposal of all types of waste including difficult and dangerous wastes.

The Company will ensure that all transportation and disposal of waste is covered by the appropriate documentation to ensure that the duty of care of the environmental protection act is fully complied with regarding controlled waste transfer notes and waste type descriptions.

The company will ensure that every effort is made to monitor the compliance of third parties within this legislation.

The company co-operates and will assist officers of the waste regulatory authorities in the exercise of their duties.

The company has a policy of compliance with the codes of practice and guidance published by the National Association of Waste Disposal Contractors in the promotion of high environmental standards for the waste industry.
